

Your Smartphone Basics — One Page

A free Lumaset Foundation cheat sheet · keep this by your phone

The buttons

Side button = screen on/off; volume buttons = louder/softer; charging port at the bottom.

Tapping the screen cannot break anything.

The gestures

Tap to open, **swipe** to scroll, **press and hold** for more options, **pinch/spread** to zoom. Get home: swipe up from the bottom (or the Home button).

Apps

Each little picture is an app. Tap to open. Can't find one? **Search** (swipe down on iPhone, up on Android, and type the name). Get new apps **only** from the App Store or Google Play.

Get online

Settings > Wi-Fi > tap your home network > type the password once. Use Wi-Fi for video calls; avoid banking on public Wi-Fi.

Make it easier

Settings > Display for bigger text and brightness. Say "Hey Siri" or "Hey Google" to use your voice.

Stay safe

Set a 6-digit passcode plus Face or fingerprint unlock. Let updates install. Never tap links or share codes from strangers.
