

# After a Breach, What Matters First

**A free Lumaset Foundation cheat sheet – keep this by your computer**

## What to Remember

- Think in chains: email, phone, banking, recovery accounts.
- Secure the highest-leverage account first.
- Change passwords from a trusted device.
- Review recovery email, phone, backup codes, and trusted devices.
- Remove old devices and old access points.
- Separate shared household logins where possible.
